Blast Protection for Your Life & Property

In addition to its original use as a protective

Device against flying or falling glass from bomb blasts, safety film is useful in protecting against the perils of nature such as earthquakes, hurricanes and other severe windstorms. Safety film also provides security against industrial explosions and crime such as burglary, forced entry, rioting, looting and vandalism. Equally important, safety film can provide protection against accidental glass breakage from thrown objects, or from children and adults walking into glass doors and windows. It is also used in cars to reduce accidental risk and

Fire & Safety Solutions

Fire extinguishers are designed to put out or control small fires. A small Fire, if not checked immediately, will soon spread out of control. In fact, most big fires start out as small ones. It is important, therefore, that you equip your workplace with the proper fire extinguishers as part of your fire protection plan.

When selecting the appropriate type of Fire Extinguisher, it is important to think about Extinguishing Agents. Each class of Fire is best fought by a specific extinguishing agent. The following is a list of commonly used fire extinguishing systems and their corresponding classes of fire. The classes are indicated in

Range Available:

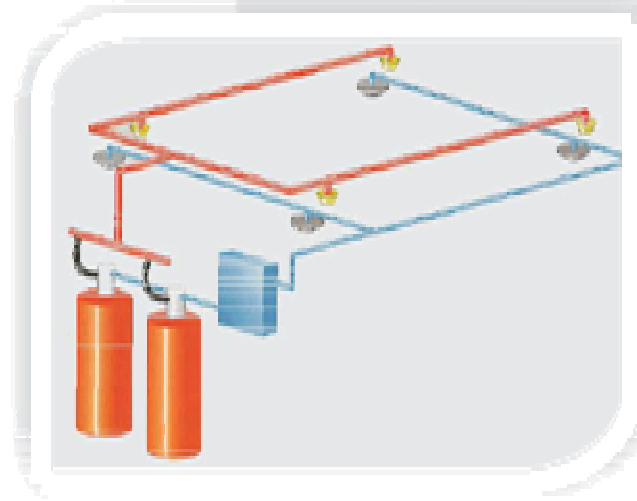

Halotron (A, B, C, E) (Indoor Only)

Dry Chemical Powder (A, B, C)

Carbon Dioxide (C, E)

Foam (AFFF), Water (A, B)

Wet Chemical (A,F)

Our company deals in **automatic Extinguishing** system i.e.

Fire Extinguisher & Refilling

FIRE & SAFETY

SAVE YOUR WORLD

Your business & Home Security

Closed circuit televisions, or CCTV, are important to keep your workplace Safe and free of intruders. They can also catch Employees goofing off on the company clock or engaged in illegal behavior.

CCTV should not be perceived as a magic wand for preventing crime - it is just another crime prevention tool from a long list available to a business. There are many reasons why CCTV is the most cost effective security solution. In our experience we have found that most businesses suffer from the same few security problems, they are; shoplifting, staff collusion, staff protection and in now a days, against terrorist activities.

Secure Access in Your Hand

Access Control always been an important factor in the fight against

Crime, but at a time of economic difficulty and widespread international tension, it is even more important to be security conscious. It is essential employees and their possessions are protected in the workplace and that a company's efforts in developing new products, materials or processes are not wasted through industrial espionage or impaired by theft and vandalism.

Controlled entry to buildings, blocks of flats and single domestic residences, either with or without video surveillance, can provide a real sense

Protection for Your Building

HESCO WALL

It is possible to design and construct walls that give complete protection from small arms and fragmentation from larger types of shells or bombs. Though total protection from blast effects may not be possible but construction of a competent defense wall may substantially reduce them. Hesco Barriers provide protection against the effects of weapons by enhancing the

ROAD BLOCKER

Security Road Blocker provides a high level of security against unauthorized vehicle access. Blockers are designed to withstand direct impact forces in excess of 1,800 Kg; the road blocker provides protection to sites from extreme Vehicle Borne Improvised Explosive Device (VBIED) attack.

Our high security hydraulic road blockers are designed and manufactured by engineers with significant experience in the fields of High Security and Access Control. Our road blocker is a highly dependable security product that will easily interface with a wide range of control equipment.

We deal in both Hydraulic & Manual blockers.

Protection for Building Boundaries

Barbed wire, a protective variety of fencing, consisting usually of several strands of wire twisted together with sharp spikes or points clinched or fastened into the strands.

Razor wire flat wrap is a series of razor wire coils clipped into the panel forms for fencing and security purpose. Made into 500mm or 900mm high normally.

Razor wire flat wrap is installed against an existing smooth wire mesh fence and substantially improves the effectiveness of the fence. Installed on this basis, innocent persons are protected from injury by the smooth wire mesh. 500 mm high razor wire flatwrap fitted to our welded mesh fence provides a neat but effective barrier fencing.
